PROFESSIONAL SUMMARY

Frontend Developer and UX/UI Designer who builds applications that deliver tangible business results, not just interfaces. I design and orchestrate AI agents and multi-agent workflows (Claude Code, MCP, LLM APIs), applying loop engineering and context engineering with human-in-the-loop quality control. A designer who codes: I take products from UX/UI design to a deployed frontend in React and Next.js. At Evolution Pos I helped clients grow restaurant revenue by up to 23,1% year over year and cut costs by 12,2% without increasing headcount.

PROFESSIONAL EXPERIENCE

Frontend Developer & UX/UI Designer

Evolution Pos | Remote | 09/2022 – Present

- Design and orchestrate AI agents and multi-agent workflows that automate coding, testing, refactoring, and code review, turning repetitive engineering tasks into reliable automated pipelines.
- Apply loop engineering and context engineering: plan-execute-review-iterate loops with custom prompt systems, tool integrations, and human-in-the-loop checkpoints that cut delivery time without sacrificing code quality.
- Architected a reusable design system with brand tokens (color, logo, typography) that turns each restaurant's identity into a ready-to-launch branded page in minutes, replacing manual per-client builds.
- Designed intuitive, responsive interfaces enabling customers to order and pay from their tables, reducing wait times by 40%.
- Developed core application features ensuring smooth navigation, high performance, and 31,2% improved scalability; implemented unit and end-to-end testing, minimizing production bugs by 40%.
- Helped increase restaurant sales by 23,1% in revenue versus the previous year, reducing the need to hire additional staff by 12,2%.

Stack: AI Agents, Multi-agent Orchestration, Claude Code, MCP, LLM APIs, Figma, Next.js, React, JavaScript, TypeScript, HTML, CSS, Zustand, Vitest, Cypress, Git, GitHub, Jira, Docker

Freelance Developer & AI Builder

Independent & Personal Projects | Remote | 2023 – Present

- DeepFilm (deepfilm.ai): designed and built the landing page for an AI video-creation platform, crafting the UX/UI and a responsive, high-performance frontend with cinematic video sections.
- Ship end-to-end web products for freelance clients, from UX/UI in Figma to a deployed frontend, plus personal projects exploring multi-agent orchestration, loop engineering, and AI-native development.

SKILLS

AI & Agents: Multi-agent orchestration, loop engineering, context & prompt engineering, human-in-the-loop systems, agentic workflows, AI-native development, Claude Code, MCP, LLM APIs

Frontend: HTML5, CSS, JavaScript, React, Next.js, TypeScript, Zustand, Cypress, Jest, Vitest

Design & Backend: UX/UI, Figma, Photoshop, Webflow, Design Systems, Node.js, REST APIs, SQL & NoSQL databases

Tools & Languages: Git, GitHub, Docker, Jira | Spanish (native), English (intermediate)

EDUCATION & CERTIFICATIONS

Bachelor's in Public Accounting, Universidad Centro Occidental "Lisandro Alvarado" | 09/2010 – 07/2015

Platzi: Frontend Developer, Practical Frontend Developer, JavaScript (fundamentals, DOM, closures & scope, async, ECMAScript 6+, testing), React.js, Next.js, TypeScript, Node.js, Docker, Professional Git & GitHub, Effective Design Systems, Figma, Photoshop, Software Engineering Fundamentals
